

MESSAGE FROM THE PRESIDENT

March 30, 2020 – Update #2

## Mt. SAC Employee Tests Positive for COVID-19

Tonight, we received notification of a second Mt. SAC employee who tested positive for COVID-19. Out of respect for this individual we are not identifying the employee.

We have investigated this case and consulted with medical professionals. Due to the length of time between the employee's last time on campus and the onset of symptoms, we believe there is no increased risk to the college community. The employee was last on campus Thursday, March 19, 2020, and did not develop symptoms until Thursday, March 26. The employee learned of the diagnosis this evening.

We will continue to provide support to our employee and the employee's family. Please join me in wishing our fellow Mountie a speedy recovery.

Bill

William T. Scroggins
